Diablo 2 druid tips. Best druid skills diablo 2.

Home/Diablo 2 Resurrected/Druid/Fury Druid Build Last updated on Sep 30, 2021 at 12:00 by MrLlamaSC 4 comments The Fury druid is one of the strongest Melee builds in Diablo 2. With extremely fast Attack Speed and a solid Health pool, this character can take on even the hardest of bosses in the game. He is better at single target damage rather than fighting large crowds so make sure to be careful in areas like the Chaos Sanctuary where you can get surrounded and Decrepifed. 1. Introduction The Fury Druid is the Druid's version of the Paladin's Zeal skill. With a large boost to Attack Rating and damage, plus the Increased Attack Speed and Life in Wolf form, this is an exciting build to play that can take advantage of a lot of weapons including Ribcracker for some insane damage. Like other classes, finding Cannot Be Frozen will be crucial to advance beyond Normal. You can check the viability of this build in PvM by consulting our PvM Tier List. 2. Fury Druid Skill Build The following section shows the core skills for the Fury Druid. For a detailed breakdown of all core and optional skills as well as the recommended order for allocating skill points, refer to the Skills page of this guide. Fury Druid Skills and Stats 1 point to all prerequisites 20 points to Werewolf — Main Transformation, required 20 points to Lycanthropy — Increases Life and Duration of Werewolf, required 20 points to Fury — Main damage skill, required 1+ points to Feral Rage — Can be useful to have up for Life Steal, required 20 points to Oak Sage — Big increase to Life Since the Fury Druid is not a starter character, we recommend using a generic Elemental Druid Build until the appropriate level. For more information, refer to the Early Leveling section of this guide. You could also Level using some of the other Wolf Skills is wanting to play Werewolf from the start. 3. Fury Druid Stat Points and Attributes Strength Dexterity Vitality Energy Enough for Gear Enough for Gear Everything Else None You can read more details about the Stats and Attribute requirements for this build on our Skills page. 4. Fury Druid Gear The following section shows some of the most important Items for the Fury Druid. For a detailed per-slot breakdown of all Fury Druid Items and alternative builds, refer to the Gear page of this guide. Fire Druid Gear and Mercenary 5. MrLlamaSC's Fury Druid Video Guide We also have a video guide that goes over the build, if you prefer that instead of or in addition to our written guide. 6. Fury Druid Breakpoints In Diablo 2, stats that affect action speed (known as frames) for attacking, casting, blocking, and recovering from a hit can almost never be taken literally. For example, gaining 10% Increased Attack Speed from an item will not necessarily translate into 10% faster attacks. To achieve faster actions, certain breakpoints must be reached, which vary for every class. The tables below list how much of a given stat is required to actually improve the action speed of the class for the stated action. 6.1. Faster Hit Recovery Breakpoints Faster Hit Recovery Breakpoints Frames to perform action 14 13 12 11 10 9 8 7 6 5 4 3 2 Faster Hit Recovery required to reach frame (Human, Two-Handed Weapon) - 0% 5% 10% 16% 26% 39% 56% 86% 152% 377% - - Faster Hit Recovery required to reach frame (Human, One-Handed Weapon) 0% 3% 7% 13% 19% 29% 42% 63% 99% 174% 456% - - Faster Hit Recovery required to reach frame (Wolf) - - - - - 0% 9% 20% 42% 86% 280% Faster Hit Recovery required to reach frame (Bear) - 0% 5% 10% 16% 24% 37% 54% 86% 152% 360% - - 6.2. Faster Cast Rate Breakpoints Faster Cast Rate Breakpoints Frames to perform action 18 17 16 15 14 13 12 11 10 9 Faster Cast Rate required to reach frame (Human) 0% 4% 10% 19% 30% 46% 68% 99% 163% - Faster Cast Rate required to reach frame (Wolf) - 0% 6% 14% 26% 40% 60% 95% 157% Faster Cast Rate required to reach frame (Bear) - 0% 7% 15% 26% 40% 63% 99% 163% 5.3. Faster Block Rate Breakpoints Faster Block Rate Breakpoints Frames to perform action 12 11 10 9 8 7 6 5 4 3 Faster Block Rate required to reach frame (Human) - 0% 6% 13% 20% 32% 52% 86% 174% - Faster Block Rate required to reach frame (Wolf) - - 0% 7% 15% 27% 48% 86% 200% Faster Block Rate required to reach frame (Bear) 0% 5% 10% 16% 27% 40% 65% 109% 223% - 7. Fury Druid Mercenary You can either choose a Defensive (Holy Freeze) or Offensive (Might) Act 2 Nightmare Mercenary depending on if you prefer a bit more safety or a bit more damage. 8. Fury Druid Early Leveling This is a generic Elemental Druid progression to help get to Level 30 where you can Respec into Fury. For more comprehensive leveling advice, please refer to our Druid Fastest Leveling Build. 9. Changelog 30 Sep. 2021 (this page): Added video guide embed. 19 Sep. 2021 (gear page): Page added. 19 Sep. 2021 (skills page): Page added. 19 Sep. 2021 (this page): Build added. Show more Show less gear for the most part is the basics you all know and remember jalals, gores, dungos angelics + 1 raven until jalals is chammed gloves are laying of hands obviously d torch and anni (resists matter most) but the big new changes for 2.4 ... are armor is now treachery (ias works) weapon is now cranium basher but u can use ribcracker until 89 swap out act 2 merc for act 3 fire merc give him flickering flame, +2 plague fireball ormus, and lidless you lose the might aura and the pride from act 2 merc as well as the high ED on fort,but since u have 90% crushing blow it really doesn't matter, the enchant is a huge AR boost (lvl 89 merc has lvl 37 enchant (it would be 38 if my plague didn't roll +1 instead of +2) and there is a major skill change as well now u put 1 point each wolf and grizzly and use prebuff spirit's (hoto prebuff if u can afford it but thats excessive) because cranium basher has such a high str req i recommend a -15% req jewel with 40 enhanced damage, that will lower the str req by 40 but you can also just show a hell in it for -20% req. use prebuff on your summons your merc will enchant them they don't do much physical damage but they tank REALLY well and they do good enough fire damage to kill physical immunes and your merc fireball hits for about 3k this allows u to have no immunes. your merc and your pets will deal with physical immunes and those annoying monsters that spawn things liek maggots and flesh spawners never spawn fire immunes so your merc fireballs melts through them easy allowing your fury to connect with the main targets much easier skill points max fury max lycanthropy max werewolf max oak sage 1 point grizzly and each wolf (unused pre-req skills are only raven and rabies) rest of points go into feral rage NOTICE feral rage skill description is bugged here is how it actually works for each "swing" of feral rage that connects you upgrade your spiny change ball by 1 the max amount of charges you can have is determined by the skill level of feral rage at lvl 1 you can have max 3 at lvl 2 you can have max 4 all odd levels starting at lvl 3 will NOT all a max charge despiteye what the skill indicates' every EVEN level. will add one max charge (starting at lvl 2) the correct life leech value for each lvl can be seen on the advanced stats tab if feral rage misses (due to attack rating miss) you wont get your next spiny orb or refresh spiny orb duration) but for reference it is skill lvl 1 - 12 life leech (3 feral swings to to reach max life leech) skill lvl 2 - 16 life leech (4 swings to to reach max life leech) skill lvl 3 - 16 life leech (4 swings to to reach max life leech) skill lvl 4 - 20 life leech (5 swings to to reach max life leech) skill lvl 5 - 20 life leech (5 swings to to reach max life leech) skill lvl 6 - 24 life leech (6 swings to to reach max life leech) skill lvl 7 - 24 life leech (6swings to to reach max life leech) skill lvl 8 - 28 life leech (7 swings to to reach max life leech) you get the idea... THE TOOLTIP IS WRONG!!! you can verify this by looking at the advanced stats tab also keep in mind that life leech works at 50% effectiveness in nightmare and 33% in hell Total Leech = Total Physical Damage * (Leech%) * (Penalty) * (Drain Effectiveness) and every monster has a leech value if said monster leech value is zero... it cant be leechd from... (you can view each leech value on the arreast summit example for example minion of destruction has a drain value of 50 in hell this means in hell if u have 100% life leech it becomes 33% becauae its hell and then 16.5% becauae minions have 50% leech value pretty much every type of "skeleton" monster has no leech value. only monsters with "flesh" have one nm and hell mephy also havw no leech value and hell diablo has no leech vlaue you can use dracs "life tap" to steel from monsters with no leech it grants 50% life leech with no reductions and ignores leech value and hell penalty if you wanted to do "pure physical" and go crazy high physical damage you could grab highlords and swap jalals for g-face, put on the raven again put fort back on and go ebodt thundermaul and use the act 2 might and with pride again... but thats way more expensive and u again deal with physical immunes. but its an option if u dont mind having things immune to you, you lose a ton of crushing blow and the ability to deal with physical immunes but gain tons of raw damage and have a high deadly strike chance to do double damage FAQ 1 What items do i prioritize when leveling? i would make sure you get your ribcracker asap, its going to be a long road before u can hit 89 and equip crainum basher, you can also easily get a +1 skills helm, +1 sigons shield and spirit sword for prebuff early make sure you put 1 point in each wolf as they become available. get CBF (cannot be frozen) as soon as possible dont be afraid to put some point into feral early if u need life leech getting it to lvl 4 or 6 is ok. but keep in mind that a better weapon means more damage which means more life leech, its going to be far more effective than adding points to feral dont max oak before lycantropy your oak is going to die a lot early on before its maxed get werewolf to around lvl 6 early-ish for attack speed but the main skill you will be maxing before you hit 30 is lycanthropy dont bother putting enough str points for cranish basher... once you hit 89 save one of your respec's for it when leveling just do enough str for gear and then pure vit getting a bit of mana leech will make leveling easier, but since you will be respecting you can also consider putting a point in hunger, i dont personally like to do this because hunger takes 3 mana to use so if u get hit by mana burn it wont help where as mana leech will help, especially if u are hit mid-fury your remaining fury of that fury hits will steal mana back 2: What are some good low level gear peices before my main equipment rib cracker is the most impot thing u can get you will be using it as soon as u can equip it durells shell is VERY nice if u cant get a lem for armor any + 1 skills helm is good for prebuff before u get jalals for boots u can use "goblin toe" before gores for gloves bloodfist is nice i also like using low sets like hsarus or sigons when leveling or if your really lucky you can use death's as that has CBF and you can finally up the belt getting angelic asap is going to help with attack rating but you any sorce of cbf you can find... even if u have to drop something else the only thing that you should prioritize over CBF is ribcracker.
